

**ZODIAC  
HURRICANE**

The Zodiac Hurricane's patented MACHII hull offers unbeatable top-end performance while working to keep the boat planing at low speeds, maintaining control and response for safe boarding operations.

## The INVISIO Intercom System. Designed for maritime support.

**The INVISIO Intercom System is light weight, plug and play and unparalleled in size, letting teams move anywhere while maintaining their communications.**

The ultimate maritime security and special forces RIB, the Zodiac Hurricane, is built for situations where mission failure is not an option.

The ability to communicate loud and clear at top speed, while exposed to extreme wind and climate conditions, is paramount to mission success.

INVISIO equipped the Zodiac Hurricane with the INVISIO Intercom System and the INVISIO T7 headset.

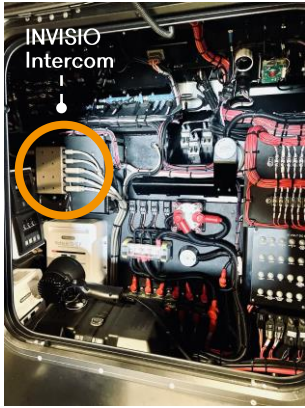

The INVISIO Intercom enables clear communication with boat crew and central command and operates seamlessly with connected devices onboard.

Submersible until 2 meters and MIL-SPEC compliant, it can withstand harsh operating environments.

Team members can access all boat communication directly from his INVISIO personal system (control unit and headset). This allows for a safe and seamless intergroup communication and connection to the devices onboard.

“The INVISIO Intercom System delivered the best speech clarity and intelligibility results ever heard on a maritime vessel going 63-64 knots, 118 KPH, or 74 MPH into a direct headwind!”, says Ralph Fyten, Contract Manager; US / Australia / New Zealand, Zodiac Hurricane Technologies Inc.

## Zodiac Hurricane configuration example:

Install and operate the INVISIO Intercom system from any platform and environment. It is designed to withstand extreme shock and vibrations.

Connect and communicate with any crew member from bow to stern and command any connected comms device with ease.

The INVISIO Volume Control allows users to independently control the incoming audio volume.

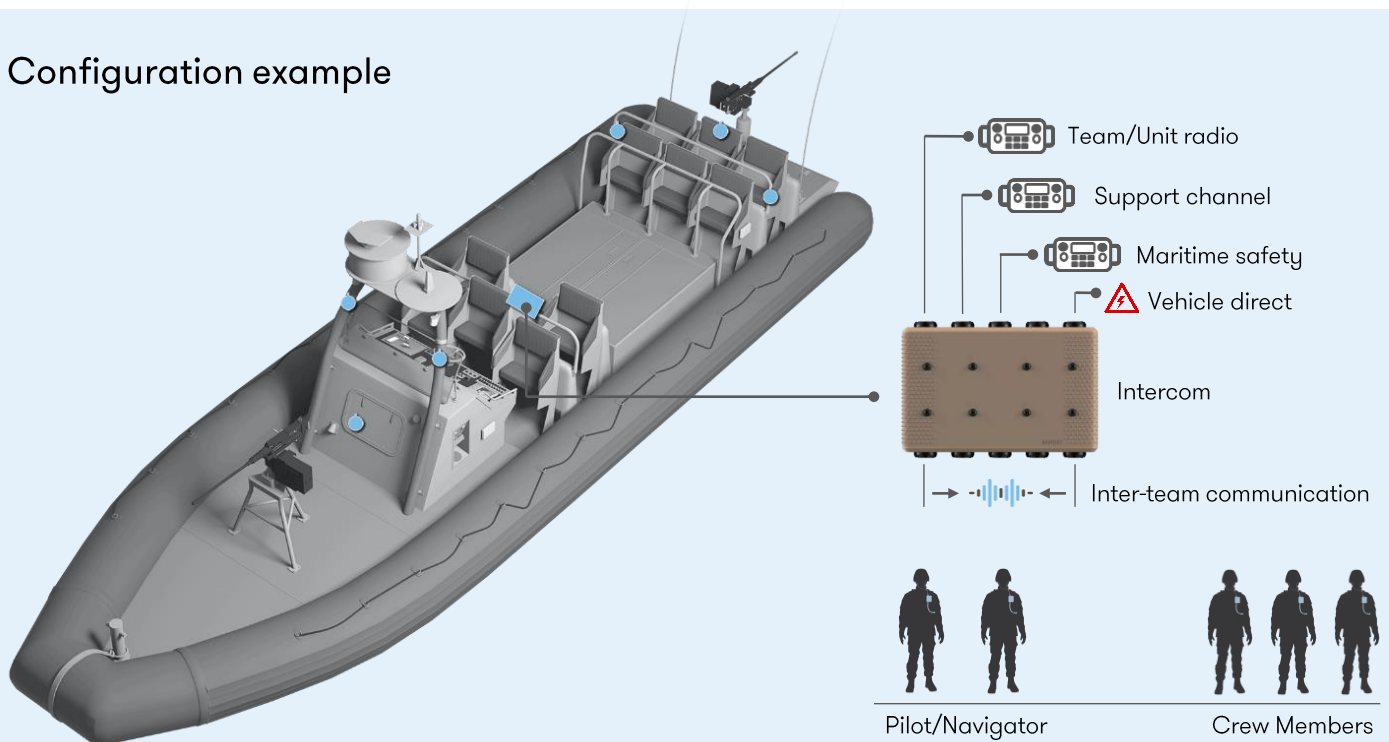

The INVISIO personal system (headset-control unit) provides clear comms and hearing protection. The INVISIO R30 remote PTT allows for hands-free communication.

## The INVISIO Intercom

The INVISIO Intercom System bridges the gap between the mounted and dismounted team member, making it possible for multiple users and radios to connect simultaneously using their existing dismounted personal communication system.

The user can access all vehicle communications directly from their INVISIO control unit, so there is no need to disconnect or connect other equipment when entering or exiting a vehicle. This allows for a safe and seamless connection to the vehicle intercom system.

## Configuration example

### Customizable solution

INVISIO will help design and customize your intercom installation. This includes cable runs and volume controls for boat crew and support areas.

Please contact your local INVISIO representative for more information or go to [invisio.com](http://invisio.com).
